A CLOSER LOOK AT DINNER ON A DISK

Using **Dinner on a Disk** is easy! Just like any cookbook, it has a table of contents, an index, and lots of delicious recipes. Unlike a cookbook, however, you need to press keys rather than turn pages. This is easy too, and to help you learn about the keys, **Dinner on a Disk** has a 'help page' telling you what keys to use.

When you first start **Dinner on a Disk** (see the "Getting Started" section) you will see the "help page" on the screen. Press <RETURN>. Now you are looking at the "category page" or table of contents. You can look up a recipe according to style of cooking by pressing the number of the category and then <RETURN>. Lets look at category 0, the index. Press <0> and then press <RETURN>. Now you are looking at the first page of the index. The recipies are arranged alphabetically. Press <← > and <→ > to flip through them. Then press <ESC> to see the category page again.

You have already used almost all the keys you will need to know! Here is a list of all of them:

<H>, <ESC>, </>, <← >, <→ >, <P>, <RETURN>

Even counting the number keys, that's certainly not very many, is it. We'll explain each of these in a little more detail below.

<H>

This key will show the "help page" on the screen. If you ever forget what key to use, pressing <H> will show you this page. When you start **Dinner on a Disk**, this is the page that you will see first.

<ESC>

This key will show you the table of contents, or "category page." The recipes are grouped according to cuisine, occasion, and so on, just like any cookbook. Typing a number and then pressing <RETURN> will take you to the first page of the category you selected. Pressing <0> and then <RETURN> will show you the index.

</>

The index shows you what page each recipe is on. To go to a recipe directly, press </>, type the page number, and then press <RETURN>. If you remember what page a recipe is on, you don't need to go to the index first.
